
Optimizing Web Graphics

description

Complete this Photoshop CC for Web Design Lynda.com tutorial. You only HAVE to complete tutorial section 8. Optimizing Web Graphics. The tutorial is 23 minutes long. You are welcome (and encouraged) to complete additional sections of this or other Lynda.com tutorials, but it is not required at this time. If you are new to using and working with Adobe Photoshop, I highly recommend completing this tutorial in its entirety

To complete the tutorial you must log in via your myau.american.edu portal. Search the 'Personalized Links' for 'Lynda Web-Based Training' and sign in using your myau credentials. Once logged into Lynda, you can search for 'Photoshop CC for Web Design with Justin Seeley' or visit <http://www.lynda.com/Photoshop-tutorials/Understanding-when-use-images-vs-CSS/145211/166633-4.html> directly (note this will only work once you are logged in).

Before beginning the Tutorial you will need to download the exercise files from the 'exercise files' button (near the top of the screen). Once downloaded, open up the Chapter 8 files, and follow along with the Chapter 8 tutorial.

If you have difficulty accessing the Lynda.com tutorials via the myAU Portal, I encourage you to first ask a friend, then contact AU HelpDesk to ensure your myAU has proper access, and then if needed e-mail me.

submission

There is **no** submission required for this component. **However, this content will be covered on the in-class quiz during our next meeting.** If you have questions or concerns after completing the tutorial, I encourage you to let me know right away.
